MEMORANDUM FOR: ▮▮▮▮▮▮ 25X1A9a   6 July 1956

1. Mr. Bissell has placed two requests on me at the 11th hour. Would you be good enough to prepare something on them for the high level briefing and keeping in mind that the due date is at the latest 15 July and if this can be prepared before that time it should be.

    a. Prepare a list of Red Targets which would show "what kind of targets we are going after" along the following lines:

        (1) Strategic Bomber bases.
        (2) Tactical Air Bases.
        (3) Submarine Bases.
        (4) Guided Missiles testing ranges (or other more appropriate GM caption)
        (5) Atomic energy plants.
        (6) Etc.

2. Choice not to exceed ten of these indicating after each the number of targets for which we have requirements, such as, "Long-range Bomber Bases--22".

3. It may be that with a little imagination some graphic tabulation could be designed which could greatly aid in the briefing. I recommend that not later than Wednesday you try out what you have found on ▮▮▮▮ 25X1A9a 25X1A9a ▮▮▮▮ who was present when Mr. Bissell levied his instruction. It may be that you would want to call on assistance from the agencies. Please do so indicating that your urgent requirement is incident to an up-coming high level briefing.

4. Mr. Dulles said to Mr. Bissell "What would we learn around Moscow for example that an Attache can't pick up?" This kind of question is the same general type we tried to answer in our memorandum on "What can we Get?", which you recall several weeks ago the Committee helped to develop.

5. My suggestion to you is that you discuss this with 25X1A9a ▮▮▮▮▮▮ who is acting for Art Lundhal. I think he can provide the assistance you need.

-2-

25X1A9a

I also suggest that you try out whatever you get produced on ▮▮▮▮▮▮▮▮
by Wednesday or Thursday, inasmuch as he was present when Mr. Bissell
gave me this problem.
